1/20/70

Paul and Gary-misc notes on CD examined in haste today.

There are more pages in CD75 then we have(or then I have) on Ampolsk. I meant to order them but didn't. There are two separate sets, ~~222-4~~ 222-4,233-3. Would yoounplesse order them, or do you want me to?

When I examined CD81, to see the picture taken by the Dallas police and used by Curry, which I ordered, there was, in the part of that file labelled "Evidence", a copy of a page of an edx by Klein's, with an encirkline on it. I ordered. Also a backgrou d picture, with no one in it, of the Neely St. House.

Gary: I ordered the pages I need better copies of from CD1140. It is followed by a typical anti-Castro speech by another, I think Ontez.

CD462, the pages we have begin with a summary relating that one Aline was interviewed at the Mex border. It bears no relationship.

CD 47 is labelled "Predotty- Oswald-Russia" . 12/2/63, Chicago. Withheld pages are Synopsis 1A,1B,1C; 10-14;16-27;39. It deals largely with reports of people reporting the President was going to be killed.

CD149:2, withheld, FBI green slip.

The Kenneth Smand name file contains only CD87:592, no attachments. Nor does the CD87 file have the attachments. There are many other relevant docs that I have had for a long time.

They have started using glasseine on some of the files.

The synopsis to 75 is duplicated now. There are two almost identical copies ofthe first page. They copied the newer one for you. The broad marks on the left-hand side are where they smudged out the classification. This is fresh. The older one bore no classifications at these points.
